What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

What is container type diesel generator set Gencircle supply?

Container type Diesel Generator Set Gencircle supply container type generator set is design in accordance with ISO/TC104 standard size,rational construction,to make sure the generator set will not be damaged due to under high pressure in transport,and is suitable for ship transportation.

Why should you choose a containerized generator set?

commercial buildings and government properties require dependable backup power in the event of utility outages to maintain continuity and prevent critical losses. The durable and high-performance Containerized Series generator sets would make the perfect power system for these types of applications.

What are the different types of container generators?

We can supply the 20' container,40' container,and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location,can run under the most demanding working conditions.

What is a containerised generator?

Our Containerised Generators deliver robust,high-capacity power from 300-3,000 kVA in secure,weather-resistant enclosures. Designed for challenging environments and critical applications,they offer noise reduction,easy transport,and bespoke configuration to meet your site's exact needs.

Why should you choose Cummins Power Generation containerized series generator sets?

Factory pre-integrated and customizable per site requirements,the new Cummins Power Generation Containerized Series generator sets can provide significantly shortened lead time for installation,and a lower cost of ownership via a flexible design.
