

What does the European Union funding call mean for battery cell manufacturing?

This funding call supports the development of battery cell manufacturing projects that align with the European Union's commitment to cutting CO₂ emissions, reducing dependence on imports, and fostering technological innovation.

Are Li-ion batteries a threat to Europe's energy transition?

Li-ion batteries play a crucial role in Europe's energy transition, yet production dominance lies with China, Korea, and Japan. To counter this dependency, Europe plans to establish 25 new gigafactories amounting to EUR 35 billion by 2030. However, defects are anticipated to occur at rates ranging from 15 % to 30 % during the initial ramp-up phase.

What is the EU-funded mebattery project?

The EU-funded MeBattery project aims to lay the foundations of a next-generation battery technology that will potentially help overcome the critical limitations of established flow and static battery systems in energy storage. The proposed battery technology will leverage the intrinsic benefits of a redox flow battery system.

What is batteries Europe?

Batteries Europe is the platform bringing together all relevant stakeholders in the European batteries research and innovation ecosystem in order to develop and support a competitive battery value chain in Europe.

What makes a battery project a sustainable investment?

Eligible projects must showcase advances in battery design, performance, and recycling processes while ensuring alignment with Europe's sustainability standards. European Commission President, Ursula von der Leyen, highlighted the significance of this investment: "Batteries are key to the future of mobility and energy storage."

What is Europe's battery initiative?

The initiative seeks to enhance Europe's capacity to compete in the global battery market while advancing the EU's Green Deal objectives and transitioning to a sustainable, zero-emission mobility system.

EU Base Station Battery Project Tender

Tender for Moldova Base Station Battery Project The tender process, launched by USAID through the Moldova Energy Security Activity (MESA) in partnership with the Ministry of Energy, ?

Dec 7, 2024 Call for proposals to support projects on electric vehicle battery cells manufacturing in order to enhance Europe's industrial capacity and leadership in this net-zero technology and ?

Dec 5, 2024 In a major step toward strengthening Europe's position in the electric vehicle market, the European Commission announces ?1 billion in funding to boost battery cell ?

Search all the announced and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in European Union (EU) Region with ?

3 days ago The Ministry of Environment and Energy is working on a plan to "salvage" standalone battery projects from the national tenders that risk missing Recovery and Resilience Facility ?

May 6, 2025 Description Following the adoption of the Horizon Europe 2025 work programme, the European Commission has launched a new call for project proposals to support research ?

Jul 7, 2025 The European Commission has allocated ?852 million in grants to six battery cell manufacturing projects under its Innovation Fund, aimed at bolstering Europe's position in ?

Dec 4, 2024 Why Energy Storage Tenders Are Reshaping Telecom Networks Let's face it ? your smartphone's "5G ready" status means nothing if the tower base station down the street has ?

Apr 30, 2024 A Horizon Europe effort to boost EU battery production is rebooting itself with a new technology strategy and new funding calls in 2025. But it acknowledges the tough ?

Jul 16, 2024 The European Commission's new Battery Fund is a critical first step to catch up by bridging the finance gap to scale up production of EU batteries, their components and the ?
