

El Salvador's first batch of 5G communication base stations

How many countries in Latin America have 5G services?

As of March 2023, eight countries in Latin America had launched commercial 5G services. The number of 5G connections is forecast to grow steadily over the next couple of years, before accelerating in the second half of the decade as new 5G markets go live and existing networks expand to cover new areas.

Is 5G a good idea for businesses in Latin America?

There is also positive sentiment towards 5G among enterprises in Latin America. GSMA Intelligence research shows that enterprises in the region across all verticals find new technologies such as 5G, private networks, massive IoT, edge and slicing compelling to advance their digital transformation.

Why does El Salvador prefer US technology products?

El Salvador's private and public sector prefers U.S. information technology products, which creates opportunities for water metering, smart traffic solutions, smart lighting systems, custom technology solutions, and city monitoring systems.

Why is mobile penetration so high in El Salvador?

Mobile penetration is remarkably high considering El Salvador's economic indicators, higher than the average for Latin America and the Caribbean. The growth in fixed-line services lowered in the face of mobile-cellular competition; fixed lines were 862,717 in 2022.

Does El Salvador have a telecommunication sector?

El Salvador's telecommunication sector has operated under a privatized legal and institutional framework since 1997, encouraging competition in most areas and allowing foreign investment.

What are El Salvador's plans?

El Salvador has ambitious plans to modernize customs, ports, airports, water, and sewage systems; and improve and expand mass mobility, lighting, surveillance of roads, and implement electronic voting.
