

Fire protection regulations for container generators

What are the fire protection regulations for diesel generator rooms?

Fire Protection Regulations for Diesel Generator Rooms in High-Rise Buildings If the building is a high-rise building, Article 8.3.3 of the ?Fire Protection Design Specification for High-Rise Civil Buildings? shall apply: The diesel generator room should meet the following requirements:

Does a generator room need a fire rating?

The generator room must have a two-hour fire rating addressed by the ventilation system. When all installation standards are met, failures due to improper installation are greatly reduced. Planned maintenance is an imperative part of any emergency generation system. An emergency generation system is comprised of many parts.

How should a diesel generator room be separated from other areas?

(1) The diesel generator room should be separated from other areas by fire-resistant walls with a fire endurance limit of not less than 2h or 3h, and the floor should have a fire endurance limit of 1.50h. Class A fire doors should also be installed.

How many fire-fighter's outfits are required in a container hold fire?

A total of at least eight (8) fire-fighter's outfits are to be provided. Where it is anticipated that more than eight (8) individuals may be actively engaged in fighting a container hold fire at any one time, the same is to be indicated on the Fire Safety Plan and additional fire-fighter's outfits are to be provided.

Can a firefighter confiscate flammable and explosive goods?

The fire fighting and rescue department may confiscate and/or destroy the dangerous flammable and explosive goods and their containers that do not comply with the technical provisions on the fire safety, and that may cause serious disasters. Article 69

What are the risks of a container fire?

Container Carriers have grown much larger in recent years and the volume of cargo carried has expanded significantly. Fires involving containers, especially with the volume of cargo now being carried, can present a substantial risk to the safety of the crew and the vessel.
