

How will solar projects be supported in Serbia?

The projects will be supported through contracts for difference for 15 years. The Serbian government has allocated a quota of 50 MW for its first solar auction. Solar plants with capacity of more than 500 kW will be allowed to participate in the competitive tendering process, with the ceiling price set at 90 (\$96.10)/MWh.

Will Serbia develop a solar power plant?

The Serbian government is seeking a strategic partner to develop at least five PV plants with a cumulative capacity of 1 GW/1.2 GWh and at least 200 MW/400 MWh of battery energy storage. State power company Elektroprivreda Srbije (EPS) will own and operate the assets.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity ten times more than Europe and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

How much do solar panels and biofuels increase in exports?

Exports of solar panels rose by 19 % in value and by 37% in quantity. Similarly, exports of liquid biofuels showed a higher increase in quantity compared with value (+63 % vs +36 %). Source dataset: Eurostat extraction

How did imports affect the value of solar panels compared to 2022?

The value of imported solar panels decreased by 12% compared with 2022 due to a drop in prices, while the quantity increased by 5%. Liquid biofuel imports recorded a 22% drop in value, with a modest 2% decline in quantity.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

Nov 11, 2024 India's solar photovoltaic (PV) module exports have seen a remarkable surge, increasing nearly 23-fold from FY22 to FY24, according to a report by the Institute for Energy ?

Oct 14, 2024 Between 2022 and 2023, the export of wind turbines saw the largest increase in value (+49 %) while their quantity increased by 26%. Exports of solar panels rose by 19 % in ?

Jan 9, 2025 Chinese solar module exports in November 2024 totaled 15.2 GW, a 14% YoY decline The largest destinations were the 5 individual markets of Brazil, the Netherlands, ?

Jun 26, 2024 Recently, China's General Administration of Customs released the import and export data of photovoltaic modules in May 2024, which showed that the export amount of ?

Jan 1, 2021 The past two decades have witnessed the dramatic growth of the photovoltaic (PV) industry in China. This study examines the impact of both internal and external forces on ?

6 days ago Explore Serbia solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights. Comprehensive data on capacity, costs, ?

Sep 13, 2025 This article provides a step-by-step guide to exporting PV modules to Serbia, addressing the certification, logistics, tariff, and payment risks that companies face, and ?

Dec 9, 2024 Indian PV module exports surged to \$2B in 2024, driven by US tariffs on Chinese imports and global demand. Learn how India is reshaping the photovoltaic market.

Jul 30, 2024 The Free Trade Agreement (FTA) between China and Serbia has entered into force earlier this month. This is the first FTA signed between China and a Central and Eastern ?

Oct 10, 2025 Explore Serbia's Free Trade Zones for solar module manufacturing. Gain duty-free export access to the EU and EAEU, plus significant tax and customs benefits.
