

How many lines are there in Stockholm metro 2025?

The official 2025 Stockholm Metro map shows three color-coded lines: Green, Red and Blue, each split into numbered routes. The Blue line runs routes T10 and T11; the Red runs T13 and T14; the Green runs T17, T18 and T19.

What is a new masterplan for Sweden's Central Station?

Today, however, we have created a new masterplan which will provide us with a great opportunity to reinstate the central station's position in the city and develop Sweden's central hub for sustainable travel. The design seeks to bring together all modes of transport in a single transportation hub, by making the following big moves:

What will the new Stockholm Central Station do?

The new Stockholm Central Station will also be built using a circular economy, constructing the new buildings from upcycled and repurposed materials, to minimise their carbon footprint. All of this will help realise the world's first climate restorative transport interchange, providing sustainable travel for all of Sweden.

How many metro lines are there in Stockholm?

The Stockholm Metro (Tunnelbana) is Sweden's only metro system. It opened in 1950. Today it has three color-coded lines: Green, Red and Blue, serving 100 stations over about 105.7 km (65.7 mi) of track. All lines converge in the city centre at T-Centralen, which links to commuter trains.

When was the Stockholm metro built?

The Stockholm Metro was built between the 40's and the 80's. Since then, the metro system has been the same until today and is carrying one million daily passengers. Today, a major expansion with 18 new stations and 30 km of new subway is well underway and the first sections are due to open for traffic in a few years.

How did the Stockholm Central Station affect the city?

When the Stockholm Central Station originally opened back in 1871, it had a detrimental effect on the urban fabric. This effect was later compounded by the introduction of the car in the 1960s.

The Central Hall is one of Stockholm's most popular interior urban spaces. We want to recreate the space as the orientational hub of the station. As the movement flows change with the new tracks and the station functions extend to the north, the Central Hall will extend towards Klarabergsgatan to bring various modes of transport together.
